

Christmas Tree Multiplication

This hands-on math activity will help kids understand the concept of multiplication. Roll the dice twice. The first roll tells kids how many Christmas tree cards to lay out. The second roll tells them how many "ornaments" (M&M's, buttons, or something else) to put on each tree. Then they can write a multiplication sentence. 4 trees x 5 ornaments on each tree = 20 total ornaments, for example.
